the authors offer an alternative to allow citizens to be informed about this kind of event so they can take preventive actions.

Chapter 17

Text Summarization and Its Types: A Literature Review	368
<i>Namrata Kumari, National Institute of Technology, Hamirpur, India</i>	
<i>Pardeep Singh, National Institute of Technology, Hamirpur, India</i>	

Text summarization is a compressing technique of the original text to form a summary which will provide the same meaning and information as provided by the original version. Summarizer helps in saving time and increasing efficiency. This chapter gives the full insight of text summarizers, which can be categorized based on methodology, function and target reader, dimension, and language. Various researches have been conducted in the field of text summarization using different approaches. Consequently, the chapter aims to provide an overview of how text summarizers work with different methods and state their domain-oriented applications. Additionally, the authors discuss multi-lingual text summarization in detail. This chapter focuses on showing the effectiveness and shortcomings of text summarization approaches by comparing them.

Chapter 18

Extractive Text Summarization Methods in the Spanish Language	379
<i>Irvin Raul Lopez Contreras, Universidad Autónoma de Ciudad Juárez, Mexico</i>	
<i>Alejandra Mendoza Carreón, Universidad Autónoma de Ciudad Juárez, Mexico</i>	
<i>Jorge Rodas-Osollo, Universidad Autónoma de Ciudad Juárez, Mexico</i>	
<i>Martiza Concepción Varela, Universidad Autónoma de Ciudad Juárez, Mexico</i>	

The quantity of information in the world is increasing every day on a fast level. This fact will be an obstacle in some situations; text summarization is involved in this kind of problem. It is used to minimize the time that people spend searching for information on the web and in a lot of digital documents. In this chapter, three algorithms were compared; all of them are an extractive text summarization algorithm. Popular libraries that influence the performance of these kinds of algorithms were used. It was necessary to configure and modify these methods so that they work for the Spanish language instead of their original one. The authors use some metrics found in the literature to evaluate the quality and performance of these algorithms.

ABSTRACT

The quantity of information in the world is increasing every day on a fast level. This fact will be an obstacle in some situations; text summarization is involved in this kind of problem. It is used to minimize the time that people spend searching for information on the web and in a lot of digital documents. In this chapter, three algorithms were compared; all of them are an extractive text summarization algorithm. Popular libraries that influence the performance of these kinds of algorithms were used. It was necessary to configure and modify these methods so that they work for the Spanish language instead of their original one. The authors use some metrics found in the literature to evaluate the quality and performance of these algorithms.
