Subject: New Note from Eduardo Jacob-Lopes, Chapter 20: Computational fluid dynamic analysis of algal bioreactors performance, Jacob-Lopes et al. - Algal Bioreactors: Vol 1: Science, Engineering and Technology of Upstream Processes

To: <fse@uaem.mx>

Dear Dr. Sierra-Espinosa

Your chapter was revised. You will see that was accepted in its current form. Although well written it needed further proofreading, so they have edited the document. At this moment, your file will be sent to the publisher for design and typesetting. In the proof correction step, you yet will be able to add some small changes.

Yours sincerely
Editors - Algal Bioreactors
