The editorial development process of your book, *Building a Low-Carbon Society Through Applied Environmental Materials Science*, has been completed, and the project is moving to production. We wanted to take a moment to thank you for all of the hard work you have put into this project to finalize the development of the book. Here, the selected chapters will be typeset, copyedited, proofread, approved, and formatted into the final book ready for printing and digital distribution. Please note that until your book officially goes to print, we may still require your assistance in ensuring the quality and completeness of your materials.

We anticipate that the book will be available for release in the coming weeks. If you have not already done so, please help us to spread the word about the book's anticipated release by sharing the news with your network, research colleagues, and throughout your current institution and alumni library network, and feel free to share the discount code **IGI35** for 35% off orders of individual access (not for library use). By doing so, you can help increase the discoverability and pre-orders for your book, ensuring that it reaches the widest possible audience. To make it easier for you to share the news, we have included the following hyperlinks:

[Recommend the book to your librarian\(s\)](#)

[Recommend the book to your colleague\(s\)](#)

As a reminder, being a valued contributor of an IGI Global publication means that you can use the Exclusive Contributor Discount of 50% on any IGI Global book to ease your research needs. Simply log into your IGI Global Portal Account, then proceed to search for the book you would like to purchase with your discount. The book will automatically reflect the discounted pricing as you browse.

Additionally, we are preparing to enhance the book's accompanying metadata that will be shared with IGI

Your Books Editorial Phases are Complete – Action(s) Requested

We are delighted to inform you that *Building a Low-Carbon Society Through Applied Environmental Materials Science*, is now available in hardcover print format. If you require a physical copy of the book, please log into your IGI Global Portal Account as when you are signed in to your account, your contributor discount of 50% will automatically be applied to any books added to your cart when shopping on the IGI Global website, including *Building a Low-Carbon Society Through Applied Environmental Materials Science*.

We have been working to put this publication in front of as many members of the academic community as possible, displaying this book in various catalogs, digital mailings, etc. Your expertise is extremely important to us in showcasing *Building a Low-Carbon Society Through Applied Environmental Materials Science* to our combined networks. If you have not done so yet, please kindly consider the following simple steps that you can take to spread the word about your work, such as:

- Sharing the book's [Webpage URL](#) across your professional network, and via social media
- [Recommend the Book to a Librarian](#)
- [Recommend the Book to a Colleague](#)
- Keep me in the loop about your upcoming participation in webinars and interviews
- Review the full list of recommended tips on the [Increase Your Book's Impact Page](#)

Please keep in touch with us throughout the book's lifecycle as to any events and conversations you are having regarding your work. We look forward to our continued collaboration to ensure that your research reaches and is used by the widest applicable audience.
