Foreword	xx
Preface.....	xxi
Acknowledgment.....	xxviii
Section 1 Ergonomic Analysis	
Chapter 1	
Individual Risk Assessment (ERIN): Method for the Assessment of Workplace Risks for Work-Related Musculoskeletal Disorders.....	1
Yordán Rodríguez, University of Antioquia, Colombia	
Chapter 2	
Ergonomic Bench to Decrease Postural Risk Level on the Task of Changing Forklift's Brake Pads: A Design Approach	28
Arturo Realyvásquez, Instituto Tecnológico de Tijuana, Mexico	
Guadalupe Hernández-Escobedo, Instituto Tecnológico de Tijuana, Mexico	
Aide Aracely Maldonado Macías, Autonomous University of Ciudad Juárez, Mexico	
Chapter 3	
Modeling Simulation-Based Agents for Reducing Operative Deferral in Oncology in a Virtual Scenario using Ergonomics.....	48
Adriana García, Universidad Politécnica de Aguascalientes, Mexico	
Alberto Ochoa-Zezatti, Autonomous University of Ciudad Juárez, Mexico	
Juan Luis Hernández Arellano, Autonomous University of Ciudad Juárez, Mexico	
Aide Aracely Maldonado Macías, Autonomous University of Ciudad Juárez, Mexico	
Section 2 Ergonomic Product Design	
Chapter 4	
Aging Suit: An Accessible and Low-Cost Design Tool for the Gerontodesign.....	56
Annika Maya Rivero, Universidad Autónoma del Estado de México, Mexico	

Chapter 5	
Product and Space Analysis Using the Product Perception Method.....	70
<i>Mario Osmar Moreno, Autonomous University of Ciudad Juárez, Mexico</i>	
<i>Juan Luis Hernández Arellano, Autonomous University of Ciudad Juárez, Mexico</i>	
Chapter 6	
Pedagogy as a Fundamental Part of School Furniture Design.....	79
<i>Natalia Anaya Echeverría, Universidad de Guadalajara, Mexico</i>	
Chapter 7	
Experimental Design to Analyze a Novel Stabilization Design of a Three-Wheel Vehicle	102
<i>Luis Elias Dávila-Leyva, Autonomous University of Ciudad Juárez, Mexico</i>	
<i>Ludovico Soto Nogueira, Autonomous University of Ciudad Juárez, Mexico</i>	
Chapter 8	
Design of Recreational Vehicles for Young and Adult People as an Alternative to Physical Activation in Open Spaces	113
<i>Mayra Ivette Peña Ontiveros, Autonomous University of Ciudad Juárez, Mexico</i>	
<i>Cesar Omar Balderrama Armendáriz, Autonomous University of Ciudad Juárez, Mexico</i>	
<i>David Cortés Sáenz, Autonomous University of Ciudad Juárez, Mexico</i>	
Chapter 9	
Trials and Simulators Research in User Analysis and Sustainable Packaging Development.....	132
<i>Berthana Ma Salas Domínguez, Universidad Autónoma Metropolitana – Xochimilco, Mexico</i>	
<i>Silvia Ana María Oropeza Herrera, Universidad Autónoma Metropolitana – Xochimilco, Mexico</i>	
Section 3	
Anthropometrics	
Chapter 10	
Anthropometry Devices: A Comparative Study	153
<i>Julian Israel Aguilar-Duque, Universidad Autónoma de Baja California, Mexico</i>	
<i>Guillermo Amaya, Universidad Autónoma de Baja California, Mexico</i>	
<i>Victor M. Juarez, Universidad Autónoma de Baja California, Mexico</i>

Juan Luis Hernández Arellano
Autonomous University of Ciudad Juárez, Mexico

ABSTRACT

In this chapter, the data collection is presented, where the base is the study of a group of elderly people in eight nursery houses and two hospitals in Bogota, Colombia. The objective of this research is to look through industrial design and the analysis of existing products, in which way the designer could offer an improvement to the products and with that how to increase the life expectancy. The user perception method is applied, therefore, and the interview was performed as a sequence of questions, where the perception of an elder of existing personal hygiene products is analyzed through a collection of data. The necessity of designing an ergonomic chair that allows performing activities of personal hygiene in the shower was identified, and the requirements for the designing of the product were identified. Finally, the designer will dedicate to find products that best fit their daily needs.

INTRODUCTION

Old age is the last stage of the life cycle that begins just at 65 years old which has certain biological, psychological, and social characteristics (Duran, 2004) Currently, the design for elderly people is done in a limited and/or poor way, therefore, elderly people present difficulties to acquire products that allow them to struggle less and risk themselves less while they do their personal hygiene activities, and more emphasis is needed in that area to create products with right characteristics for the capacities and needs, that help them improving life quality (Martha, 2007). Wong & Diaz (2007) state that life quality of elderly people is a satisfactory life, subjective and psychological wellness, personal development and different
